

## Basic Sniper

**Scroll down for course description, equipment needs, & schedule below.**

**This course is NOT eligible for CPT hours**

### HOST THIS TRAINING

**The OTOA does not teach one specific “Tactic.” The OTOA instructors teach “Principles.”**

- The OTOA response protocols are built around basic principles.
- Violation of basic principles develops into poor tactics.
- The applications of fundamental principles lead to safer tactics.

The OTOA Basic Sniper School commences with classroom instruction, covering essential topics such as equipment selection, setup, ammunition selection, and a comprehensive internal, external, and terminal ballistics review.

The range instruction component focuses on honing fundamental marksmanship skills. This includes training on alternative shooting positions, zeroing a rifle, mastering grouping techniques, and ensuring precise scope tracking.

Live-fire exercises and function drills are strategically designed to evaluate the reliability of the rifle/optic combination in real field conditions.

Students will engage paper and steel targets up to 300 yards (range dependent) using a variety of improvised positions.

The course concludes with a preventative maintenance and equipment care session, ensuring a holistic understanding of sniper operations.
