SPECIAL PRICING FOR THESE OPTICS ARE OFFERED TO THE STUDENTS OF THIS CLASS ONLY

This class is going to discuss aspects of carbine / AR platform deployment and operation equipped with a low-powered variable optic (LPVO)

This is a course that will improve upon current carbine skill levels and vastly improve upon the economy of movement, deployment, and operator efficiency.

This is not a caliber-specific course. Any caliber used in Law Enforcement deployment is acceptable.

We **STRONGLY** suggest you have a basic zero on your rifle before arrival. You need to be able to hit an 8.5x11 sheet of paper when we start.

Topics:

- Safety
- Equipment selection and considerations
- Zeroing and offset considerations
- Fundamentals / Diagnostics
- Reloads: Emergency and Administrative
- Clearing malfunctions
- Transitions
- Multiple threats/threat selection
- Barricades
- Distance and accuracy
- Cruiser deployment
- Working around vehicles
- Movement while shooting
- Unorthodox shooting positions

If you DO NOT have an LPVO but want to gain knowledge, you can still attend this class.

Email training@otoa.org to request an optic-ready loaner rifle courtesy of Vortex Optics and American Defense Manufacturing—NO ADDITIONAL CHARGE.

We have a LIMITED amount of optic-ready rifles to provide; register early and reserve your rifle today

Required Kit:
